Course evaluation GISN23 "GIS in tourism and recreational management" spring 2020

Course coordinator: Micael Runnström

Teachers in the course: MR

Number of students: 12 registered students

Grade distribution: 4 st VG, 2 st G, 6 st ej klara än.

Evaluation

Summary of the course evaluation

Number of survey responses: 7, (including students finishing from earlier registration years).
The course grades as a very good course (4.6) and the workload is about right for a 7.5 hp course. The course challenges the students of both theoretical issues (a course book is read parallel to the practical GIS assignments.
One student has commented:
"This course was challenging but it gave me confidence to do more advanced work in the subject."

Comments from the teaching team
No comments

Evaluation of changes implemented since the last time the course was given
No changes implemented since last time.

Suggestions for changes to implement before the course is given the next time
Nothing. The course works fine. I would however like to update the statistical tourism data that the students work with in the practical exercise 1.
