

# Course Summary for NGEA05 "GIS & RS for environmental studies" vt 2022

**Course coordinator:** Micael Runnström

**Teachers in the course:** MR, Helena Elvén Eriksson, Tristan Bakx,

**Number of students:** 7 registered students

**Grade distribution:** 0 UK, 2 G, 5 VG.

## Evaluation

### Summary of the course evaluation

Number of survey responses: 3, of which is 43 % of the students

*Short summary of the evaluation responses:* In general the students were satisfied with the course. The overall grade for the course is 3.3. 1 student have rated it as 1 and the other 2 students as 4 and 5 respectively. !! Did the student accidently choose 1 ? as all 3 students have later rated the course as 4 (good)??

The work load seems to be good in the course (4-5).

Lectures and exercises are considered good (Mean – 4.0)

The two bigger projects are ranked high (Mean - 4.3)

All students are content with the skills after the course.

The course started as digital course because of the pandemic but at halftime we could move to campus which the students were happy with!

### Comments from the teaching team

Teachers' opinion is that the course went well.

The course has every year been slightly changed and updated in reference to course evaluations. Additionally the software has changed into ArcGIS Pro.

Now it looks as if the course have been adjusted to a good course. This year too few students (normal around 20), so hopefully next time it will be a normal group number of students.

### Suggestions for changes to implement before the course is given the next time

No changes are planned for next time (VT 2023).
