

# Course Summary for "Introduction to GIS, NGEA11" ht 2021

Course coordinator: Micael Runnström

Teachers in the course: Micael Runnström, Abdulghani Hasan, Helena Eriksson, Karin Larsson, Per-Ola Olsson, Vaughan Philips, Mitch Selander, Didac Pascual.

Number of students: 53 registered students

Grade distribution: 6 st UK, 24 st G, 23 st VG.

## Evaluation

### Summary of the course evaluation

Number of survey responses: 30, of which is 56 % of the students

Short summary of the evaluation responses: In general the students were satisfied with the course (overall score of 3.7, on a scale 1-5). The students were particularly satisfied with the practical exercises and lectures. However, the course was still run in eMode because of COVID-19, and the students didn't think they got enough supervision through the exercises on-line. The difficulty level gets 3.1 so it seems that the course is at a good level and for the workload in comparison to the credits given gets 3.1 so the workload seems to be OK. Next year we hope that the course can be given on Campus so that supervision and lectures can be physical meetings and more direct help can be provided to the students.

### Comments from the teaching team

Teachers' opinion is that the course went well

### Evaluation of changes implemented since the last time the course was given

Since the last time we have implemented some updates of exercises and I consider this an improvement of the practical parts in the course.

### Suggestions for changes to implement before the course is given the next time

No changes but physical meetings.
